SECTION 4: First aid measures

4.1. Description of first aid measures

- First-aid measures after inhalation : Take proper precautions to ensure your own safety before attempting rescue (e.g. wear appropriate protective equipment). Remove source of contamination or move victim to fresh air.
- First-aid measures after skin contact : Avoid direct contact. Wear chemical resistant protective clothing if necessary. As quickly as possible, flush with lukewarm gently flowing water for at least 20 minutes or until chemical is removed.
- First-aid measures after eye contact : Avoid direct contact. Wear chemical resistant gloves if necessary. Quickly and gently blot away chemical. Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 20 minutes or until the chemical is removed, while holding the eyelid(s) open. Take care not to rinse contaminated water into the unaffected eye or onto the face. Obtain medical attention immediately.
- First-aid measures after ingestion : NEVER give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 240 to 300 ml (8 to 10 oz.) of water to dilute material in stomach. If milk is available, it may be administered AFTER the water has been given. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Repeat administration of water. Quickly transport victim to an emergency care facility.
